

Thaaher

Senior Data Scientist & Machine Learning Engineer
d@gmail.com

SUMMARY

Senior Data Scientist and Machine Learning Engineer with expertise in developing and deploying production-grade machine learning systems, Generative AI, large language models (LLMs), MLOps, and scalable AI-driven software products. Proficient in collaborating with cross-functional data science and engineering teams to design, automate, and maintain end-to-end ML pipelines, APIs, cloud-based model serving, and enterprise AI applications. Skilled in Python, FastAPI, Flask, TensorFlow, PyTorch, Scikit-Learn, AWS SageMaker, Azure ML, Google Cloud Vertex AI, MLflow, Docker, CI/CD, Retrieval-Augmented Generation (RAG), LangChain, and vector databases. Demonstrated success in delivering AI/ML solutions that enhance operational efficiency, reduce costs, accelerate deployment timelines, and drive data-informed business decisions.

SKILLS

Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models, MLOps, LLMops, Model Deployment, Model Serving, Machine Learning Pipelines, Workflow Automation, CI/CD Pipelines, Python, Scikit-Learn, TensorFlow, Keras, PyTorch, Hugging Face Transformers, FastAPI, Flask, Streamlit, REST APIs, GraphQL, Docker, GitHub Actions, MLflow, ZenML, AWS SageMaker, AWS Lambda, AWS Bedrock, AWS EC2, Azure ML, Azure AI, Azure App Services, GCP Vertex AI, GCP Cloud Functions, GCP Cloud Run, BigQuery, Pandas, NumPy, PySpark, SQL, NoSQL, Pinecone, Faiss, Chroma DB, LangChain, LangGraph, LlamaIndex, RAG, Prompt Engineering, Natural Language Processing, Computer Vision, OpenCV, Predictive Modeling, Time Series Analysis, Data Visualization, Statistical Analysis, A/B Testing, Microservices Architecture, Agile Methodologies, Stakeholder Management, Team Leadership

EXPERIENCE

Senior Data Scientist & Machine Learning Software Engineer - PURELOGICS

12/2024 - Present

- Designed, deployed, and optimized end-to-end AI/ML pipelines on AWS SageMaker, AWS Bedrock, AWS Lambda, GCP Vertex AI, BigQuery, and Cloud Run for scalable model serving and real-time insights.
- Led enterprise AI deployments including RAG pipelines for business intelligence, remote patient monitoring AI workflows, GPT-4o conversational AI systems, and agentic AI platforms for legal and financial advisory use cases.
- Built production-ready Generative AI and machine learning solutions using LangChain, LangGraph, PhiData, Pinecone, graph databases, and autonomous agent frameworks.
- Collaborated with cross-functional teams to align AI strategy with business objectives and deliver reliable, maintainable, cloud-based AI-enabled software products.
- Optimized MLOps and LLMops lifecycle workflows from experimentation to deployment, monitoring, and continuous improvement.
- Mentored AI/ML teams in LLM fine-tuning, Retrieval-Augmented Generation, model lifecycle management, and AI-powered automation.

Senior Data Scientist, Machine Learning & Generative AI Engineer - NVIDIA

08/2024 - Present

- Contributed to GPU-optimized AI applications and enterprise Generative AI solution testing through NVIDIA and Z by HP developer programs.
- Developed, tested, and evaluated open-source and enterprise-level LLMs, including vLLMs, for Generative AI use cases.
- Integrated NVIDIA tools and SDKs to optimize AI solutions for performance, scalability, and deployment readiness.
- Collaborated with technical teams to validate AI tools, frameworks, and workflows for large-scale model deployment.
- Supported open-source LLM initiatives and community innovation in Generative AI and production AI systems.

Senior Data Scientist & Machine Learning Engineer - BLOCBELT

12/2022 - 12/2024

- Led development of AI-driven SaaS and PaaS solutions, managing a team of three across big data, data analysis, and AI engineering initiatives.
- Delivered AI and data products that generated \$2M in client cost savings through workflow optimization, automation, and predictive analytics.
- Improved sales forecasting accuracy by 80-90% using machine learning and data analysis across 120+ market entities.
- Launched a personalized fashion e-commerce platform with a recommendation engine, increasing sales by 80% and online orders by 200%.
- Developed statistical models, dashboards, and predictive analytics solutions that increased company revenue by 18% and improved data visibility by 45%.
- Integrated AI capabilities into SaaS and PaaS offerings, supported distributed systems, and executed 25+ A/B tests to improve digital sales experiences.

AI Data Scientist Kaggle Master Mentor - GOOGLE-KAGGLE

12/2022 - 11/2024

- Mentored aspiring data scientists through the Kaggle-X BIPOC Mentorship Program, dedicating 20 hours weekly to technical skill development and applied machine learning guidance.
- Ranked among the Top 100 Kaggle contributors globally and recognized as the first Pakistani mentor in the program.
- Led a team of four mentees in data science, machine learning, and real-world problem-solving projects.
- Collaborated on high-impact AI projects and contributed to the global data science community.

Data Scientist - Crypto-Express

01/2022 - 12/2022

- Developed an anti-spoofing face application to strengthen digital identity security and reduce identity fraud by 70%.
- Applied machine learning and deep learning techniques to improve operational efficiency by 25% and reduce operational costs by 15%.
- Built predictive models and delivered actionable insights that contributed to a 20% revenue increase.
- Performed exploratory data analysis, machine learning modeling, and deep learning development, saving 250+ hours of manual analysis annually.
- Deployed AI/ML projects remotely while adapting to dynamic business and technical requirements.

Artificial Intelligence Engineer - Pakistan Freelancing Training Center

01/2021 - 12/2021

- Led AI and data science training sessions focused on practical, real-world machine learning applications.
- Designed and deployed models using TensorFlow and Keras to improve system efficiency and accuracy.
- Automated repetitive data tasks using Python, reducing manual effort and error rates.

- Supported applied AI research and translated emerging methodologies into project-based learning.

PROJECTS

AutoML-Studio

Built a low-code/no-code machine learning platform for classification, regression, time-series forecasting, and clustering. Integrated MLflow for experiment tracking, SHAP for explainability, data drift detection for monitoring, and FastAPI and Streamlit for deployment.

Customer Satisfaction Prediction System

Created an MLOps-based predictive analytics system using ZenML and MLflow, achieving 93% accuracy in forecasting customer satisfaction and streamlining model pipeline management for business decision-making.

Conversational AI Chatbot for Customer Support

Designed and deployed an enterprise-grade chatbot using GPT-4o, LangChain, and AWS Bedrock with intent recognition and dynamic response generation, reducing customer query resolution time by 40%.

Health Assistance Application

Architected a healthcare AI application using Gemini 1.5 Pro, RAG, and LangChain to support symptom analysis, treatment suggestions, preventive guidance, and personalized medical information retrieval.

DocuWiz AI

Engineered a document intelligence platform using BART, DistilBERT, RAG, Streamlit, and FastAPI for text extraction, summarization, sentiment analysis, and PDF/DOCX insights, reducing document processing time by 60%.

AI-Powered Blog Generator

Developed an AI content generation application using Llama 3.1 8B, AWS Bedrock, RAG, and Streamlit to automate blog creation, editing, and publishing workflows.

Harvestify AI-Powered Plant Health Assistant

Designed and deployed an Azure-based computer vision application for real-time plant disease detection, crop recommendations, and fertilizer suggestions, reducing disease detection time by 70% and improving crop yield predictions by 30%.

Intelligent Document Summarization Tool

Developed a transformer-based summarization tool using Pegasus, FastAPI, and Streamlit to generate concise summaries from PDF and DOCX files, reducing manual review time by 60%.

EDUCATION

Bachelor in Computer Science, Major: Artificial Intelligence and Computer Science - Institute of Management Sciences
