

Anafa Fariyaa

Computer Science Engineering Student

fariyaa2005@gmail.com | 9384686999 | Chennai, Tamil Nadu | [linkedin.com/in/anafa-fariyaa](https://www.linkedin.com/in/anafa-fariyaa) | github.com/anxfairytale

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate at Vellore Institute of Technology, Chennai, with a 9.08/10 CGPA and practical experience in software development, computer vision, AI-driven applications, and full-stack prototype creation. Proficient in Python, Java, C, C++, JavaScript, SQL, data structures, algorithms, object-oriented programming, operating systems, databases, and computer networks. Hands-on experience with Vue.js, Flutter, TensorFlow, Git, and Google Colab for application development and testing. Strong focus on scalable software engineering, AI integration, debugging, performance optimization, and delivering clean, efficient solutions to complex engineering challenges.

CORE SKILLS

Python • Java • C • C++ • JavaScript • SQL • Data Structures • Algorithms • Object-Oriented Programming • Database Management Systems • Operating Systems • Computer Networks • Computer Architecture • HTML • CSS • Vue.js • Flutter • TensorFlow • Computer Vision • NLP • Deep Learning Fundamentals • Git • GitHub • Kaggle • Google Colab • VS Code • Debugging • Testing

PROFESSIONAL EXPERIENCE

Software Development Intern | 2X Smart Solutions Pvt. Ltd.

May 2026 – June 2026

- Developed and tested an image and video-sharing platform prototype, contributing to feature implementation and application functionality.
- Built a Netflix-inspired streaming application using Vue.js, strengthening front-end engineering and component-based development skills.
- Designed and implemented an AI-powered resume tailoring system that customizes resumes against job descriptions while preserving factual candidate information.
- Supported debugging, testing, deployment preparation, and feature enhancements across software prototypes.
- Applied software design, problem-solving, and programming fundamentals to deliver internship projects within a 60-day timeline.

Computer Vision Research Intern | Defence Research and Development Organisation (DRDO)

May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets using Python and TensorFlow.
- Used Kaggle datasets to support object detection experimentation and model workflow development.
- Performed preprocessing, training, testing, and evaluation tasks for computer vision models.
- Gained hands-on experience with AI/ML workflows, dataset handling, model experimentation, and performance evaluation.

PROJECTS

AI-Powered Resume Tailoring System

Designed a system that tailors resumes to job descriptions while preserving factual information, supporting PDF upload and ATS-focused optimization.

Driver Drowsiness Detection System

Built a real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism for road safety.

Smart Attendance System

Developed a Flutter-based QR attendance application with productivity-focused features for attendance tracking.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using Python and TensorFlow for object detection experimentation on armoured vehicle imagery.

Four-Way Traffic Light Controller with Pedestrian Crossing

Created an FPGA-based traffic management system to control four-way signals and pedestrian crossing logic.

Course Management System

Developed a Java-based application demonstrating object-oriented programming principles and structured software design.

EDUCATION

Bachelor of Technology in Computer Science Engineering | Vellore Institute of Technology (VIT), Chennai

Expected Graduation: 2028

CERTIFICATIONS

- Cisco Networking Basics
- Introduction to Cybersecurity
- Introduction to IoT and Digital Transformation

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10 in Computer Science Engineering.
- Active LeetCode problem solver.
- Completed internships in software development and computer vision.
- Completed relevant coursework in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Computer Architecture, and Web Programming.
