

deepak

Computer Science Engineering Student | Software Development Intern
deepak.2x@yopmail.com | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in software development, frontend application prototypes, AI-powered systems, computer vision, and database fundamentals. Skilled in JavaScript, Vue.js, Python, Java, C, C++, SQL, data structures, algorithms, object-oriented programming, software design, operating systems, computer networks, and debugging. Experienced in building and testing application prototypes, improving usability, and applying core computer science concepts to practical technical challenges. Interested in full stack development, scalable software systems, backend engineering, and performance-focused application development.

CORE SKILLS

Proficient in JavaScript programming and development, Vue.js, Python, Java, C, C++, SQL, HTML, CSS, Flutter, TensorFlow, Computer Vision, NLP, Deep Learning Fundamentals, Data Structures and Algorithms, Object-Oriented Programming, Software Design, Database Management Systems, Operating Systems, Computer Networks, Computer Architecture, Git, GitHub, Kaggle, Google Colab, VS Code, Debugging, Testing, Application Development, NumPy, Pandas

PROJECTS

AI-Powered Resume Tailoring System

Designed a resume optimization system that analyzes job descriptions and customizes resumes while preserving factual information. Built support for PDF upload and ATS-focused resume enhancement.

Driver Drowsiness Detection System

Developed a real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism to support road safety.

Smart Attendance System

Built a Flutter-based QR attendance application with productivity-focused features for streamlined attendance tracking.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using Python and TensorFlow for image detection experimentation on Armoured Fighting Vehicle datasets.

Four-Way Traffic Light Controller with Pedestrian Crossing

Created an FPGA-based traffic management system demonstrating digital logic design and structured control flow for pedestrian crossing support.

Course Management System

Developed a Java-based course management application demonstrating object-oriented programming principles and software design fundamentals.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected Graduation: 2028

CERTIFICATIONS

- Cisco Networking Basics
- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT) and Digital Transforms

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10.0 in Computer Science Engineering.
- Active LeetCode problem solver.
- Completed internships in software development and computer vision.
- Completed relevant coursework in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Computer Architecture, and Web Programming.
