

Anafa Fariyaa

Computer Science Undergraduate | Software Development Intern | Full Stack & AI/ML Projects
b@gmail.com | 9384686990 | Chennai, Tamil Nadu | linkedin.com/in/anafa-fariyaa | github.com/anxfairytale

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate at VIT Chennai with hands-on internship experience in software development and computer vision. Proficient in Python, Java, JavaScript, SQL, Vue.js, Flutter, TensorFlow, data structures, object-oriented programming, DBMS, operating systems, and computer networks. Demonstrated ability in developing web application prototypes, AI-powered tools, and computer vision pipelines, emphasizing clean code, thorough testing, debugging, and optimization for performance and ATS compatibility.

CORE SKILLS

Python • Java • C • C++ • SQL • JavaScript • HTML • CSS • Vue.js • Flutter • TensorFlow • Computer Vision • NLP • Deep Learning Fundamentals • Data Structures and Algorithms • Object-Oriented Programming • Database Management Systems • Operating Systems • Computer Networks • Computer Architecture • Git • GitHub • Kaggle • Google Colab • VS Code • Debugging • Testing • Web Application Development

PROFESSIONAL EXPERIENCE

Software Development Intern

2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026

- Developed and tested an image and video-sharing platform prototype, contributing to core application functionality and user-facing features.
- Built a Netflix-inspired streaming application using Vue.js with a focus on responsive UI development and structured component implementation.
- Designed and implemented an AI-powered resume tailoring system that customizes resumes based on job descriptions while preserving factual candidate information.
- Supported debugging, testing, deployment preparation, and feature enhancement activities across software development workflows.

Computer Vision Intern

Defence Research and Development Organisation (DRDO) | May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets using Python and TensorFlow.
- Used Kaggle datasets to perform object detection experimentation, preprocessing, model training, testing, and evaluation.
- Contributed to computer vision workflows focused on dataset preparation, model experimentation, and performance assessment.

PROJECTS

AI-Powered Resume Tailoring System

Developed an AI-driven resume optimization tool that tailors resumes to job descriptions while preserving factual information. Supported PDF upload and ATS-focused content refinement.

Driver Drowsiness Detection System

Built a real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism to improve road safety.

Smart Attendance System

Created a Flutter-based QR attendance application with productivity-focused features for streamlined attendance tracking.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using Python and TensorFlow for image detection experimentation on Armoured Fighting Vehicle datasets.

Four-Way Traffic Light Controller with Pedestrian Crossing

Developed an FPGA-based traffic management system demonstrating digital logic design for vehicle and pedestrian signal coordination.

Course Management System

Built a Java-based course management application demonstrating object-oriented programming principles and structured application design.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected 2028

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT)

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10.0 in Computer Science Engineering.
- Active LeetCode problem solver.
- Completed internships in software development and computer vision.
