- %a Application Development

Professional Summary

Computer Science Engineering student with a strong foundation in data structures, algorithms, object-oriented programming, software design, operating systems, database systems, and computer networks. Hands-on experience in software development, computer vision, and AI-powered applications using Python, Java, C/C++, JavaScript, SQL, TensorFlow, Vue.js, and Flutter. Proven ability to build and test prototypes, debug issues, and apply computer science fundamentals to real-world engineering problems. Eager to contribute to scalable, high-performance systems and collaborative software engineering teams.

Professional Experience

Software Development Intern

- 2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026
- %a Developed and tested an image and video-sharing platform prototype, contributing to feature implementation, debugging, and deployment preparation.
 - %a Built a Netflix-inspired streaming application using Vue.js with a focus on user interface development and core application functionality.
 - %a Designed and implemented an AI-powered resume tailoring system that analyzes job descriptions and customizes resumes while preserving factual candidate information.
 - %a Collaborated on feature enhancements, testing workflows, and issue resolution to improve application stability and usability.

Computer Vision Intern

- Defence Research and Development Organisation (DRDO) | May 2025 – June 2025
- %a Worked on image detection pipelines for Armoured Fighting Vehicle datasets using Python and TensorFlow.
 - %a Performed data preprocessing, model training, testing, and evaluation workflows for object detection experimentation.
 - %a Used Kaggle datasets and machine learning tools to support computer vision research and model experimentation.
 - %a Applied deep learning and image processing fundamentals to analyze detection results and improve experimentation quality.

Projects

AI-Powered Resume Tailoring System

Designed a resume optimization system that customizes resumes based on job descriptions while preserving factual information. Built support for PDF upload and ATS-focused resume enhancement.

Driver Drowsiness Detection System

Developed a real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism to support road safety.

Smart Attendance System

Built a Flutter-based QR attendance application with productivity-focused features for streamlined attendance tracking.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using Python and TensorFlow for image detection experimentation on Armoured Fighting Vehicle datasets.

Four-Way Traffic Light Controller with Pedestrian Crossing

Created an FPGA-based traffic management system demonstrating digital logic design and structured control flow for pedestrian crossing support.

Course Management System

Developed a Java-based course management application demonstrating object-oriented programming principles and software design fundamentals.

Education

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected 2028

Certifications

%^a Cisco Networking Basics

%^a Cisco Introduction to Cybersecurity

%^a Cisco Introduction to Internet of Things (IoT) and Digital Transforms

Achievements

%^a Maintained a CGPA of 9.08/10.0 in Computer Science Engineering.

%^a Active LeetCode problem solver.

%^a Completed internships in software development and computer vision.

%^a Completed relevant coursework in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Computer Architecture, and Web Programming.
