SKILLS

- Python
- Java
- C
- C++
- SQL
- JavaScript
- HTML
- CSS
- Vue.js
- Flutter
- TensorFlow
- Computer Vision
- NLP
- Deep Learning Fundamentals
- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Computer Architecture
- Git
- GitHub
- Kaggle
- Google Colab
- VS Code

PROFESSIONAL SUMMARY

Computer Science Engineering student at VIT Chennai with a strong academic record and hands-on experience in software development, computer vision, and AI-assisted tools. Skilled in Python, Java, C/C++, JavaScript, SQL, data structures, algorithms, OOP, databases, and computer networks. Built and tested applications involving web development, image detection, streaming, and ATS-focused resume tailoring. Eager to apply problem-solving, collaboration, and software design skills to scalable systems and AI-driven products.

PROFESSIONAL EXPERIENCE

Software Development Intern

2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026 (60 Days)

- Developed and tested an image and video-sharing platform prototype.
- Built a Netflix-inspired streaming application using Vue.js.
- Designed and implemented an AI-powered resume tailoring system that customizes resumes based on job descriptions while preserving factual information.
- Supported debugging, testing, deployment preparation, and feature enhancements across the development cycle.

Computer Vision Intern

Defence Research and Development Organisation (DRDO) | May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets.
- Used Python, TensorFlow, and Kaggle datasets for object detection experimentation.
- Performed preprocessing, training, testing, and evaluation workflows for computer vision models.

PROJECTS

AI-Powered Resume Tailoring System

Tailors resumes according to job descriptions while preserving factual information. Supports PDF upload and ATS-focused optimization.

Driver Drowsiness Detection System

Real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism for road safety.

Smart Attendance System

Flutter-based QR attendance application with productivity features.

Image Detection in Armoured Fighting Vehicles

Computer vision project using TensorFlow and Python for image detection experimentation.

Four-Way Traffic Light Controller with Pedestrian Crossing

FPGA-based traffic management system with pedestrian crossing support.

Course Management System

Java-based application demonstrating object-oriented programming principles.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected 2028

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT)

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10 in Computer Science Engineering.
- Active LeetCode problem solver.
- Completed internships in software development and computer vision.
