

Anafa Fariyaa

Software Engineering Intern Candidate

fariyaa2005@gmail.com | 9384686990 | Chennai, Tamil Nadu, India | [linkedin.com/in/anafa-fariyaa](https://www.linkedin.com/in/anafa-fariyaa) | github.com/anxfairytale

PROFESSIONAL SUMMARY

Computer Science student at VIT Chennai with a strong academic record and hands-on experience in software development, computer vision, and AI-powered applications. Proficient in Python, Java, C/C++, JavaScript, and SQL, with coursework in data structures, algorithms, operating systems, computer networks, and database systems. Experienced in building and testing prototypes, working with TensorFlow and Vue.js, and applying computer science fundamentals to real-world problems. Interested in scalable systems, AI-integrated software, and high-performance engineering.

CORE SKILLS

Python, Java, C, C++, SQL, JavaScript, HTML, CSS, Vue.js, Flutter, TensorFlow, Computer Vision, NLP, Deep Learning Fundamentals, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Computer Architecture, Git, GitHub, Kaggle, Google Colab, VS Code

PROFESSIONAL EXPERIENCE

Software Development Intern

2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026 (60 Days)

- Developed and tested an image and video-sharing platform prototype.
- Built a Netflix-inspired streaming application using Vue.js.
- Designed and implemented an AI-powered resume tailoring system that customizes resumes based on job descriptions while preserving factual information.
- Supported debugging, testing, deployment preparation, and feature enhancements.

Computer Vision Intern

Defence Research and Development Organisation (DRDO) | May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets.
- Used Python, TensorFlow, and Kaggle datasets for object detection experimentation.
- Performed preprocessing, training, testing, and evaluation workflows.
- Analyzed model outputs and refined experiments to improve detection workflow quality.

PROJECTS

AI-Powered Resume Tailoring System

Tailors resumes according to job descriptions while preserving factual information, with PDF upload and ATS-focused optimization.

Driver Drowsiness Detection System

Real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism.

Smart Attendance System

Flutter-based QR attendance application with productivity-oriented features.

Image Detection in Armoured Fighting Vehicles

Computer vision project using Python and TensorFlow for image detection experimentation.

Four-Way Traffic Light Controller with Pedestrian Crossing

FPGA-based traffic management system designed for pedestrian safety and controlled signal operation.

Course Management System

Java-based application demonstrating object-oriented programming principles.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected 2028

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT)

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10.0 in Computer Science Engineering.
- Active LeetCode problem solver.
- Completed internships in software development and computer vision.
