

Anafa Fariyaa

Computer Science Engineering Student | Software Engineering Intern Candidate

fariyaa2005@gmail.com | 9384686990 | Chennai, Tamil Nadu | [linkedin.com/in/anafa-fariyaa](https://www.linkedin.com/in/anafa-fariyaa) | github.com/anxfairytale

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate at Vellore Institute of Technology, Chennai with a 9.08/10 CGPA and hands-on experience in software development, computer vision, AI-powered applications, and full-stack prototypes. Skilled in Python, Java, C, C++, JavaScript, SQL, data structures, algorithms, object-oriented programming, database systems, operating systems, and computer networks. Experienced in building AI-integrated tools, image detection pipelines, web applications, and real-time computer vision systems with a strong focus on debugging, testing, and practical problem solving.

CORE SKILLS

Python • Java • C • C++ • JavaScript • SQL • Data Structures and Algorithms • Object-Oriented Programming • Software Design • Database Management Systems • Operating Systems • Computer Networks • Computer Architecture • HTML • CSS • Vue.js • Flutter • TensorFlow • Computer Vision • NLP • Deep Learning Fundamentals • MongoDB • Sequelize • Git • GitHub • Kaggle • Google Colab • VS Code • Debugging • Testing

PROFESSIONAL EXPERIENCE

Software Development Intern

2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026

- Developed and tested an image and video-sharing platform prototype, contributing to feature implementation and application reliability.
- Built a Netflix-inspired streaming application using Vue.js with a focus on responsive user interface development.
- Designed and implemented an AI-powered resume tailoring system that customizes resumes based on job descriptions while preserving factual candidate information.
- Supported debugging, testing, deployment preparation, and feature enhancement across software development workflows.

Computer Vision Intern

Defence Research and Development Organisation (DRDO) | May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets using Python and TensorFlow.
- Performed dataset preprocessing, model training, testing, and evaluation for object detection experimentation.
- Used Kaggle datasets and computer vision workflows to analyze detection performance and improve experimentation quality.
- Applied machine learning and software engineering fundamentals to real-world defense-oriented image analysis tasks.

PROJECTS

AI-Powered Resume Tailoring System

Designed an AI-integrated application that tailors resumes to job descriptions while preserving factual information. Supports PDF upload and ATS-focused optimization for improved resume relevance.

Driver Drowsiness Detection System

Built a real-time fatigue detection system using computer vision and facial landmarks with a multi-stage alert mechanism to support road safety.

Smart Attendance System

Developed a Flutter-based QR attendance application with productivity-focused features for streamlined attendance tracking.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using TensorFlow and Python for object detection experimentation on Armoured Fighting Vehicle image datasets.

Four-Way Traffic Light Controller with Pedestrian Crossing

Created an FPGA-based traffic management system simulating four-way traffic control with pedestrian crossing functionality.

Course Management System

Built a Java-based course management application demonstrating object-oriented programming principles and structured software design.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected Graduation: 2028

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT)

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10 in Computer Science Engineering.
- Active LeetCode problem solver: leetcode.com/u/fariyaatale
- Completed internships in software development and computer vision.
- Relevant coursework includes Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Computer Architecture, and Web Programming.
