

Anafa Fariyaa

Computer Science Engineering Student | Software Engineering Intern Candidate

fariyaa2005@gmail.com | 9384686999 | Chennai, Tamil Nadu, India | [linkedin.com/in/anafa-fariyaa](https://www.linkedin.com/in/anafa-fariyaa) | github.com/anxfairytale

PROFESSIONAL SUMMARY

Computer Science Engineering student at Vellore Institute of Technology, Chennai, expected to graduate in 2028 with a 9.08/10 CGPA. Experienced in software development, AI-powered applications, computer vision, full-stack prototypes, and application testing. Skilled in Python, Java, C, C++, JavaScript, SQL, data structures, algorithms, object-oriented programming, software design, operating systems, database systems, and computer networks. Hands-on experience building applications with Vue.js, Flutter, TensorFlow, Git, Kaggle, and Google Colab. Strong interest in scalable software engineering, AI-integrated systems, debugging, performance-focused development, and applying computer science fundamentals to real-world engineering challenges.

CORE SKILLS

Python • Java • C • C++ • JavaScript • SQL • Data Structures • Algorithms • Object-Oriented Programming • Software Design • Database Management Systems • Operating Systems • Computer Networks • Computer Architecture • HTML • CSS • Vue.js • Flutter • TensorFlow • Computer Vision • Natural Language Processing • Deep Learning Fundamentals • Machine Learning • Git • GitHub • Kaggle • Google Colab • VS Code • Debugging • Testing • Application Development • AI-Integrated Software

PROFESSIONAL EXPERIENCE

Software Development Intern

2X Smart Solutions Pvt. Ltd. | May 2026 – June 2026

- Developed and tested an image and video-sharing platform prototype, contributing to feature implementation, debugging, and deployment preparation.
- Built a Netflix-inspired streaming application using Vue.js, focusing on responsive user interface development and application functionality.
- Designed and implemented an AI-powered resume tailoring system that analyzes job descriptions and customizes resumes while preserving factual candidate information.
- Collaborated on feature enhancements, testing workflows, and issue resolution to improve application stability, usability, and maintainability.

Computer Vision Intern

Defence Research and Development Organisation (DRDO) | May 2025 – June 2025

- Worked on image detection pipelines for Armoured Fighting Vehicle datasets using Python and TensorFlow.
- Performed data preprocessing, model training, testing, and evaluation workflows for object detection experimentation.
- Used Kaggle datasets and machine learning tools to support computer vision research and model experimentation.
- Applied deep learning and image processing fundamentals to analyze detection results and improve experimentation quality.

PROJECTS

AI-Powered Resume Tailoring System

Designed a resume optimization system that analyzes job descriptions and customizes resumes while preserving factual information. Built support for PDF upload and ATS-focused resume enhancement.

Driver Drowsiness Detection System

Developed a real-time fatigue detection system using computer vision and facial landmark analysis with a multi-stage alert mechanism to support road safety.

Smart Attendance System

Built a Flutter-based QR attendance application with productivity-focused features for streamlined attendance tracking and improved usability.

Image Detection in Armoured Fighting Vehicles

Implemented a computer vision project using Python and TensorFlow for image detection experimentation on Armoured Fighting Vehicle datasets.

Four-Way Traffic Light Controller with Pedestrian Crossing

Created an FPGA-based traffic management system demonstrating digital logic design, structured control flow, and pedestrian crossing support.

Course Management System

Developed a Java-based course management application demonstrating object-oriented programming principles and software design fundamentals.

CERTIFICATIONS

- Cisco Networking Basics
- Cisco Introduction to Cybersecurity
- Cisco Introduction to Internet of Things (IoT) and Digital Transforms

EDUCATION

Bachelor of Technology in Computer Science Engineering

Vellore Institute of Technology (VIT), Chennai | Expected Graduation: 2028

ACHIEVEMENTS

- Maintained a CGPA of 9.08/10.0 in Computer Science Engineering.
- Active LeetCode problem solver: leetcode.com/u/fariyaatale.
- Completed internships in software development and computer vision.
- Completed relevant coursework in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Computer Architecture, and Web Programming.
